COMP5201

Assignment 3

Fall 2020

Prof. D.K. Probst

Output:

```
f: Fetched instruction: l|124.
d: Set opc to 'l'
d: Set D_Out1 to 105.
d: Set D_Out2 to 4.
d: Set dreg to f2.
x: X_Out = 105 + 4
m: Set M_Out to 19
w: Set f2 to 19
f: Fetched instruction: 1|348.
d: Set opc to 'l'
d: Set D_Out1 to 203.
d: Set D_Out2 to 8.
d: Set dreg to f4.
x: X_Out = 203 + 8 = 211
m: Set M_Out to 43
w: Set f4 to 43
f: Fetched instruction: m|246.
d: Set opc to 'm'
d: Set D_Out1 to 19.
d: Set D_Out2 to 43.
d: Set dreg to f6.
x: X_Out = 19 * 43 = 817
m: No operation
w: Set f6 to 817
f: Fetched instruction: a | 468.
d: Set opc to 'a'
d: Set D_Out1 to 43.
d: Set D_Out2 to 817.
d: Set dreg to f8.
x: X_0ut = 43 + 817 = 860
m: No operation
w: Set f8 to 860
f: Fetched instruction: b|550.
d: Set opc to 'b'
d: Set D_Out1 to 301.
d: Set D_Out2 to 301.
d: 301 == 301: equal, branch not taken
x: No operation
m: No operation
w: No operation
f: Fetched instruction: s|368.
d: Set opc to 's'
d: Set D_Out1 to 203.
d: Set D_Out2 to 8.
d: Set sval to f6's value: 817.
x: X_0ut = 203 + 8 = 211
m: Store in memory: Mem[211] 'f6' that is equal to 817
w: No operation
f: Fetched instruction: s|584.
d: Set opc to 's'
d: Set D_Out1 to 301.
d: Set D_Out2 to 4.
d: Set sval to f8's value: 860.
x: X_0ut = 301 + 4 = 305
m: Store in memory: Mem[305] 'f8' that is equal to 860
w: No operation
f: Fetched instruction: b|790.
d: Set opc to 'b'
d: Set D_Out1 to 148.
d: Set D_Out2 to 156.
d: 148 != 156: not equal, branch taken
d: Terminate program
x: No operation
m: No operation
w: No operation
```
